

The image displays a 100x100 grid of plus (+) and minus (-) signs. The signs are distributed across the grid in a way that suggests a complex, possibly fractal-like pattern. Some rows are entirely composed of plus signs, while others are entirely composed of minus signs. The majority of the grid is filled with a mix of the two signs, creating a dense, textured appearance. The pattern of signs is not uniform, with some areas appearing more 'plus-heavy' and others more 'minus-heavy'. The overall effect is a large-scale visual representation of a binary or ternary sequence.

A 10x10 grid of 100 small crosses arranged in a regular pattern.
